Marleys Pink Parasol® Japanese Snowbell

Styrax japonica 'JLWeeping'
US PP 23,755 P3

JLPN Inc. is proud to introduce you to Marleys Pink Parasol; a new Pink Weeping *Styrax japonica* introduction, represented by Upshoots LLC.

Marleys Pink Parasol exhibits leaves much larger in length and width, darker green, and glossier than most cultivars of Snowbell. The true magnificence of this tree is in the profuse blooming character. Blooms are a lustrous pink shade, with a light sweet fragrance of cotton candy. The fall color is bright lemon-yellow.

This new introduction displays good pest and disease resistance, and is a spectacle and centerpiece in patio containers, small gardens or landscape.

Mature Height 8-10'; Width 4-5'; Zone 5
